

Bentham High Yield Fund

Annual Fund Profile – 30 June 2024

Investment Style

The Bentham High Yield Fund (the Fund) is actively managed and focused on generating higher income than traditional fixed income investments.

The Fund provides diversified exposure to the US high yield bond market with active allocation between individual securities and industries.

Investment Objective

The investment objective of the Fund is to outperform the Merrill Lynch High Yield Cash Pay Constrained Index (hedged to AUD) over the suggested minimum investment timeframe. The Fund's investment performance is also compared with the Bloomberg AusBond Composite Bond Index.

The Fund aims to provide returns higher than traditional fixed interest investments through investing primarily in US sub- investment grade corporate debt securities.

Management Team

Bentham is a specialist fixed interest and credit investment manager. Bentham actively manages a number of high yielding funds with varying risk profiles. The portfolios are designed to generate income while diversifying risk in global credit markets. Bentham's goal is to deliver higher income to investors than can generally be achieved in traditional fixed interest and equity markets. Prior to the establishment of Bentham, the founders worked together as part of the Credit Investments Group of Credit Suisse Alternative Capital Inc. Credit Suisse continues to provide exclusive sub-advisory investment management services for the Fund. Bentham has 17 staff located in Australia and the Credit Investments Group has over 50 investment staff based in New York and London. The US team have a strong track record of managing riskier High Yield (non-investment grade) portfolios and are well resourced with market leading risk portfolio systems.

Fund Facts

Fund name	Bentham High Yield Fund
Investment Manager	Bentham Asset Management
Responsible Entity	Fidante Partners Services Limited
Fund aim	To provide investors with a diversified exposure to the US high yield bond market with active allocation between individual securities and industries

- Open Fund with daily unit pricing
- Australian domiciled trust with a 25 year+ track record – one of Australia's longest running high yield funds
- Investments not generally available to direct retail investors
- Access to a global investment universe.

High Yield Bonds – Overview

High yield bonds are corporate debt securities that are generally senior unsecured or subordinated and have below investment grade credit ratings. High yield bonds generally pay a fixed rate coupon. This fixed rate tends to be much higher than investment grade bonds in order to compensate investors for default risk. While high yield bonds are traded in many geographical locations, the US has the largest and most mature high yield bond market.

Historically, the high yield bond market has outperformed cash and has had a low correlation with traditional fixed interest and equity markets.

Portfolio construction

The Fund consists mainly of high yield unsecured bonds with additional discretion to make investments in senior secured loans and collateralised loan obligations.

The Fund is constructed using bottom up analysis to select individual investments and employs a conservative approach to credit selection emphasising preservation of principal.

Using a credit-intensive relative value approach, high yield bonds are managed on the belief that returns above benchmark are driven by a strong credit culture and a systematic investment process. Security selection is based on relative value within the capital structure of comparable companies and industries.

The preservation of principal plays an important role in the investment process and the Fund has a high level of industry and issuer diversification.

The portfolio is highly diversified with less than 2% maximum exposure to any one company. The portfolio will usually have more than 150 separate issuers spread across many different industries.

Fund Risk Profile

Suggested investment time frame	Medium to long term – three years plus
Volatility/risk level	Medium
Income distribution frequency	Quarterly
Fund benchmark	ICE - ICE BofAML US Cash Pay High Yield Constrained Index (hedged into Australian dollars)
Currency exposure	Hedged into Australian dollars
Diversity	Minimum of 50 issuer exposures
Issuer exposure limits	Maximum of 2% per issuer
Industry exposure limits	Maximum of 12% per industry

Distribution as a % of Net Asset Value (NAV)*

Financial Year	Sep	Dec	Mar	Jun	FYTD*
2024	1.74	1.74	1.75	1.75	7.36
2023	2.04	2.04	2.06	2.05	8.69
2022	1.12	1.13	1.11	1.10	3.91

Past distributions are no indication of future distributions.

Distribution as a % of Net Asset Value (NAV), which is calculated as the cents per unit (CPU) distribution at month end divided by the ex-distribution unit price at the start of the month.

* Annual Distribution Return (Year-to-Date) is calculated as the Total Return (after fees) minus Growth Return. Total Returns (after fees) are calculated using pre-distribution month end withdrawal unit price and assumes all distributions are reinvested. Growth Returns equal the percentage change in the unit price.

Long-Term Correlation of Asset Class Returns#^

High yield bonds as an asset class have historically had some correlation to equities and a negative correlation to government bonds as shown in the table below. An allocation to high yield bonds may improve the diversity of a balanced portfolio and has historically improved the risk and reward outcome.

	Australian Bank Bills	Global Govt Bonds	Australian Fixed Interest	Australian ILBs	US IG Corporates	Leveraged Loans	US High Yield	World Equities (Unhedged)	Australian Equities	US Preferred Securities	Emerging Market Bonds	Australian Property
Australian Bank Bills	1.00

Risk and Return

High yield bonds have historically generated returns above the Bloomberg AusBond Composite Bond Index over the medium to long term. High Yield bonds as an asset class have a level of intermediate risk as characterised in the risk return chart below. For specific and current return data please refer to the current monthly fact sheets or quarterly commentaries.

Historical returns versus historical risk (30 June 2024)

Current yield versus historical risk (30 June 2024)

^ Overseas yields are hedged into AUD using the one-month interest rate differentials *The Australian Equities and World Equities (unhedged) yields represent the estimated earnings yield. The historical standard deviation shown for these equity asset classes is based on the total return for the relevant index. The total return on equities will generally be comprised of both dividend income and share price movement and as a result could vary substantially from those shown above. The outcomes shown above may be affected by known or unknown risks and uncertainties that cannot presently be identified. Accordingly actual outcomes may differ from those shown above.
Asset Class definitions; Australian Cash is Bloomberg AusBond Bank Bill Index, Global Govt Bonds is JP Morgan GBI, Australian Fixed Interest is Bloomberg AusBond Composite Bond Index, US IG Corporates is Barclay's US Corporates, US Leveraged Loans is Credit Suisse Leveraged Loans Index, US High Yield Bonds is Credit Suisse High Yield Bond Index, World Equities (Unhedged) is Morgan Stanley MSCI Index (Developed), Australian Equities is S&P/ASX200 Accumulation Index, US Hybrid Securities is Merrill Lynch BoA Preferred Hybrids Index, Emerging Market Bonds is JP Morgan EMBI+, and Australian Property Trusts is S&P/ASX200 Accumulation A-REIT Index. Overseas index returns (except World Equities) are fully hedged into Australian dollars.
